Signature \_\_\_\_\_

Please complete all relevant sections of this form and post the completed form NO LATER THAN Monday, 15th October 2007 to Conference Secretariat: Scotland Against Cancer, BioMedEx, 22 Allan Road, Killearn, Glasgow G63 9QE UK or book on-line at [www.scotlandagaincancer.org.uk](http://www.scotlandagaincancer.org.uk).

### Open discussion forum:

MSPs are asked to participate in discussion groups addressing two of the below seven topics. Please indicate in the corresponding box your preferred topic choice by grading 1 to 7 (with 1 being the highest preference and 7 the lowest). While the indicated preferences will be taken into account as much as possible, we cannot guarantee that you will be given your first two choices.

[ ]	<b>Topic 1</b>	Meeting the public health challenge How do we tackle our poor public health record and encourage health and wellbeing in Scotland?
[ ]	<b>Topic 2</b>	Improving survival- screening, diagnosis and rapid access to treatment We know that if cancer is diagnosed early, patients have a much greater chance of survival. How can we improve the early detection rate and ensure rapid progression from referral to treatment?
[ ]	<b>Topic 3</b>	Continuity of care - living with cancer For patients, the transitions between acute, community and social care can be difficult and bewildering. How can we better co-ordinate care for cancer patients?
[ ]	<b>Topic 4</b>	Quality in cancer care Helping to improve the care that cancer patients receive is a key part of NHS Quality Improvement Scotland's (NHS QIS) work. How can we ensure that the delivery of quality improvements in cancer care is informed by the issues facing cancer patients and those involved in providing cancer services?
[ ]	<b>Topic 5</b>	Equality in cancer care How do we ensure equality of access at every stage of the patient journey?
[ ]	<b>Topic 6</b>	The future of cancer research in Scotland How can we support high quality research and its translation from bench to bedside?
[ ]	<b>Topic 7</b>	Learning from the patient experience How best can the patient voice be heard in the development of cancer policy and service planning?
